The G20 has set targets for improving the cost, speed, transparency and access of international payments by 2027

We share this vision and are working to make it a reality.

Funds need to be moved across borders faster and easier to facilitate these trends

<p>Cost</p> 	<p>Retail Payments: Global average cost (fees & FX margin) < 1% No corridor with cost > 3%</p>
<p>Speed</p> 	<p>75% of payments funds available in <1 hour The rest within one business day</p>
<p>Access</p> 	<p>End-users to have at least one option for sending and receiving electronic payments</p>
<p>Transparency</p> 	<p>All providers to share total transaction cost, expected time to deliver funds, tracking of payment status and terms of service</p>

Swift is transforming the end-to-end cross-border payment process.

Deep dive into your end customer needs for each part of the payment journey
